Education

Boise State University — Boise, ID
Bachelor of Science in Computer Science, Cybersecurity Emphasis — *Aug. 2023 – Dec. 2027*

Experience

Cybersecurity Resiliency Intern — March 2026 – Present
St. Luke's Health System — *Boise, ID*

- Supported cybersecurity preparedness, disaster recovery, and downtime readiness initiatives across a healthcare environment
- Developed and distributed 1,000+ downtime playbooks and charts and updated 300+ emergency communication phones to support hospital operations during extended downtime
- Developed monthly phishing reviews reporting simulation statistics across the health system to support cybersecurity awareness and education
- Helped develop and coordinate phishing simulations to strengthen employee awareness of ongoing phishing threats

Guest Advocate — May 2024 – June 2026
Target, Inc. — *Boise, ID*

- Delivered customer service by answering questions, resolving concerns, and supporting front-end operations
- Managed front-end workflow by running the board and coordinating employee schedules and breaks
- Awarded Employee of the Month in July 2025 for exceptional customer service and teamwork

Safeway, Inc. — Spokane, WA
Courtesy Clerk / Cashier — *June 2022 – August 2023*

- Advanced from Courtesy Clerk to Cashier while supporting customer service and daily front-end operations
- Processed customer purchases and assisted with self-checkout, payment issues, and customer questions
- Supported front-end operations through bagging, carry-out assistance, cart collection, and customer service

Projects

OpenSSH Log Analyzer | *Java, SQLite, B-Trees, Git* — March 2026 – May 2026

- Built a Java application to parse and analyze 194,000+ OpenSSH server log entries for security-related activity
- Implemented a custom disk-based B-Tree and SQLite storage to efficiently organize and retrieve log data
- Analyzed authentication activity by IP address and timestamp to identify repeated attempts and attack patterns

Secure Password Vault | *Java, HTML, CSS* — Oct. 2025 – Dec. 2025

- Developed a Java-based password vault for securely storing and managing user credentials
- Implemented authentication, password hashing and salting, and input validation using secure coding practices

Skills & Qualifications

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS, R
Tools: Git, GitHub, Linux, Docker, VS Code, IntelliJ, Microsoft Office
Cybersecurity: Proofpoint, Everbridge, Wazuh, Autopsy, phishing awareness, incident preparedness
Technical: Software development, debugging, troubleshooting, testing, technical documentation
